

Q1 of 14

What will be the output of the below program?

```
public class Demo {  
    public static void main(String[] args) {  
        int num1 = 20;  
        double num2 = 0;  
        if (num1 >= 20)  
            num2 = 1.5;  
        if (num1 < 30)  
            num2 = 2;  
        System.out.println("Value of num2 is " + num2);  
    }  
}
```

- ☐ Value of num2 is 2
- ☐ Value of num2 is 1.5
- ☒ Value of num2 is 2.0
- ☐ Runtime error due to datatype conversion
